

"A Family Serving Families"

To our valued families and community, we want to inform you of the steps we are taking in response to the new Corona Virus "Covid-19" to keep you and our employees safe.

To the funeral industry, on March 16, 2020, the CDC and National Funeral Directors Association put forth guidelines to help slow the spread of and help limit all of our exposure to COVID-19 and we feel it a prudent course of action to follow their recommendations.

At this time these are recommendations only and are not mandatory. These recommendations are subject to change as new information and CDC guidelines become available. In the event local, state or federal mandates are issued we will abide by those mandates.

For large events and mass gatherings, which includes visitations and funeral services, the CDC and NFDA have recommended the following:

"...for large events and mass gatherings, [the CDC] recommends that for the next 8 weeks, organizers (whether groups or individuals) cancel or postpone in-person events that consist of 50 people or more throughout the United States."

The CDC has also recommended that all people practice social distancing, self-quarantine measures and good hand washing hygiene.

To help accomplish these measures, we are making the following recommendations to the families we serve.

- We recommend that family members who are sick not attend arrangement conferences, visitations or services.
- We recommend that funeral arrangement conferences be attended by essential family members only.
- We recommend that all funeral visitations be held 1(one) hour prior to the service and that both visitation and funeral service be attended only by members of the deceased family.
- With the family's permission, and where available, we will begin streaming funeral services through our Facebook pages via "Facebook Live."

If you have any questions or need assistance please do not hesitate to contact us.
